Odoo Magento connector also known as Odoo Magento extension or bridge is one of the best connector developed by Globalteckz team specifically for eCommerce merchants who want to manage their Magento store in ERP software. Odoo Magento Connector offers you with synchronization of data between Odoo and Magento.

Odoo 9 – Magento Module installation guide.

INSTALLATION:

There are few python packages needs to be installed on Odoo server using ssh.

Check the python version which should be 2.7 or above

- python-suds
- pythons-clients

To install the modules follow few steps as there are different modules .

You can see the folder name as `_Feature_modules` which are used for extra features available in Magento Settings.

So now copy your `globalteckz_magento` module in `custom_addons` or `addons` folders to get visible in Odoo.

Copy all the modules to custom addons or addons folder to get visible in Odoo There is Main magento module which is `globalteckz_magento` and other modules are the features which are required while installing from Magento Settings tab.

-Main Module : `globalteckz_magento`

Feature modules :

-`globalteckz_auto_delivery_create`

-`globalteckz_auto_invoice_create`

-`globalteckz_complete_delivery`

-`globalteckz_done_state`

-globalteckz_import_complete_order

-globalteckz_open_state

-globalteckz_simple_product

-globalteckz_validate_delivery

Dependent module :

- product_images_olbs

Follow the above steps to install the module smoothly.
